Eco-Logic Permaculture & Landscape Design is able to help prime contractors in their requirement to establish and maintain systems for soil regeneration, efficient water use and purification, waste reduction, tree and plant health, drought mitigation, and beneficial habitat creation in any climate.

- Extensive Plant Knowledge
- Phytoremediation and Mycoremediation of Polluted Sites
- Experienced With Small Lots to Large Acreages
- Multifunctional Space Design
- Storm Water Infiltration and Grey Water Design
- Soil Regeneration
- Riparian and Range Land Restoration
- Native and Beneficial Wildlife Habitat Creation and Restoration
- Drought Mitigation and Desertification Reversal
- Reduction of Maintenance, Chemical Dependency, Water, and Power costs
- Fire Mitigation, Suppression, and Recovery

Past Performance:

Master Planning for privately owned 55 acre rural parcel, including Powlonia cash crop production forest, outdoor classroom, parking, guest camping, and forest restoration.

Master Planning for urban lot including soil restoration, balancing of winter sun and summer shade cover, storm water capture and utilization, pollinator habitat, utilization of front yard for outdoor living space, and privacy from neighboring structures.

Tree Mitigation Planning exceeding native tree requirements and adding supportive plantings, storm water capture, and soil restoration.

COMPANY DATA:
LABVN Company ID: 100561
D-U-N-S Number:
08-123-3452
CAGE Code 8MK36
NAICS Codes: 541320,
541320, 541320.
Certifications in Process:
Woman-Owned Business
Disadvantaged Business Entity
Small Business
DEGREES: MFA Applied Craft
+ Design, BLA Landscape
Architecture, CERTIFICATE
Permaculture Design

★ **DIFFERENTIATORS:** Eco-Logic is significantly different from other landscape design firms because I am able to professionally create both aesthetically pleasing and ecologically rich multifunctional habitats that support people and wildlife harmoniously in any climate and on any size property.

Rather than add to the waste stream and increase project costs, Eco-Logic is dedicated to demonstrate resilient and efficient resource organization and utilization. My passion is land regeneration for the mutual benefit of people and Nature. The result of my expertise is significant reductions in maintenance, power, water, and replacement costs as well as passive increases in watershed, soil, and tree health, biodiversity, and air and water quality.

COMPANY DESCRIPTION: Eco-Logic Permaculture & Landscape Design has been sought out since 2004 for the professional application of advanced training in both landscape architecture and permaculture design.
